Noise measuring sensor for Smart Cities

*Optional

PRESENTATION

Noise has become an essential vector when sensing smart cities.

CESVA's more than 45 years of experience designing and manufacturing sound level meters are concentrated in the TA120 noise measuring sensor.

The TA120 brings together in a small sized single piece of equipment, the accuracy of a Class 1 sound level meter, maximum protection of a professional outdoor kit (rain, snow, wind, dust, birds, IP65) and full connectivity with major open source platforms and industrial protocols.

The TA120 requires minimal annual maintenance and can be verified with an acoustic calibrator (IEC 60942).

The TA120 offers you high precision and reliability noise measurements.

APPLICATIONS

- Smart Cities sensing
- Noise surveillance networks (permanent monitoring):
 - Road and port infrastructures
 - Industrial activities
 - Separate waste collection routes
 - Control of Works
- Noise monitoring:
 - Concerts, festivals, major events and exhibitions
 - Sports events and racetracks
 - Quiet areas (acoustically protected)
- Generating noise maps and displaying in real time noise levels

MAIN FEATURES

- Class 1 precision sensor according to IEC 61672-1.
- Protection against external agents with an outdoor kit: wind, rain and birds. Keeps class 1 precision. IP65 protection.
- Can be fully integrated into different platforms: NoisePlatform (CESVA), open source ones such as Sentilo or proprietary platforms like Telefónica or Smarty Planet.
- Light weighted small sized and easy to install in street lights, marquees, billboards, shelters, kiosks and advertising posts.
- Powered by mains, POE (Power over Ethernet), 12 VDC (Solar panels*, external batteries).
- Continuous measurement 24 h/7 days a week.
- Minimum annual maintenance. Materials used in the manufacture of TA120 ensure a long life.
- Removable outdoor kit for quick verification and adjustment with an acoustic calibrator (IEC 60942).
- Network with unlimited number of sensors
- Communication by Ethernet (RJ45), Wi-Fi*, 3G modem*, 4-20 mA loop*.

TA120

TECHNICAL SPECIFICATIONS

Noise measuring sensor for Smart Cities

**Optional*

***Integration times shorter than 10s require high-speed networks*

NOISE MEASUREMENT ACCORDING TO IEC 61672

DETECTOR:	Equivalent continuous sound level
FREQUENCY WEIGHTING:	A
MEASURED FUNCTION:	Equivalent level with programmable integration time from 1s** to 60min with frequency weighting A: LAeqT
RESOLUTION	0.1 dB
ACCURACY according to IEC 61672-1:	class 1
MEASUREMENT RANGE single rang:	from 35 to 120 dBA
LINEARITY RANGE a 1kHz :	from 35 to 120 dBA
ACOUSTIC VERIFICATION:	with acoustic calibrator (IEC 60942)

MICROPHONE

TYPE:	½" condenser microphone
POLARIZATION:	0 V
NOMINAL SENSITIVITY:	25,0 mV/

PROTECTION AGAINST EXTERNAL AGENTS

OUTDOOR KIT:	
PROTECTION AGAINST:	Rain, snow, wind and birds
DEGREE OF PROTECTION PROVIDED BY THE ENCLOSURE	
DEGREE:	IP65

CONNECTIVITY

USB COMMUNICATION for configuration:	
TYPE:	Digital complies with USB rev. 2.0 (type B)
ETHERNET COMMUNICATION for data transmission:	
CONNECTOR:	RJ45
4-20 mA CURRENT LOOP:	
CL120 module* required	
TYPE:	Analog
3G/GPRS COMMUNICATION for data transmission:	
MR120 module* required	
Wi-Fi COMMUNICATION for data transmission:	
WF120 module* required	

OPTIONS*

WF120	Module for data transmission Wi-Fi
MR120	Module for data transmission 3G/GPRS

TRANSMISSION PROTOCOLS

PROTOCOL :	HTTP, HTTPS (Secure connection)
IP ADDRESS:	Static or dynamic (DHCP)
FORMAT :	Sentilo JSON, Ultralight 2.0, Other (Consult)

REMOTE CONTROL

FEATURES :	Remote configuration of the sensor Automatic firmware update (via OTA)
-------------------	---

POWER

MAINS:	100/240 V~ 0.6 A 50/60 Hz
TYPICAL POWER CONSUMPTION:	1 W
POWER CONSUMPTION charging BA120 battery*:	18 W

URBAN LIGHTNING NETWORK: BA120 battery* required
Powering from the urban lightning network with battery support.

PoE (Power over Ethernet)

Uninterrupted power through the Ethernet cable.

12 VDC INPUT:

Powering from 12 V external batteries and solar panel PS120* (BA120 Battery* required):

TYPICAL POWER CONSUMPTION:	1 W
POWER CONSUMPTION charging BA120 battery*:	15 W

ENVIRONMENTAL CRITERIA

INFLUENCE OF THE TEMPERATURE:

CORRECT NOISE MEASUREMENT RANGE:	from -10 to +50 °C
RANGE FOR CORRECT CHARGING AND DISCHARGING OF THE BATTERY*:	from 0 to +40 °C

INFLUENCE OF THE HUMIDITY:

CORRECT NOISE MEASUREMENT RANGE:	from 25 to 90 %
----------------------------------	-----------------

DIMENSIONS, WEIGHT & MARKING

DIMENSIONS:	395 x 120 x 91 mm
WEIGHT:	without battery 960 g with battery* 1150 g

MARKING: CE MARK, WEEE MARK

CL120	Analog output for 4-20mA current loop
BA120	Internal lithium battery for 24h cycles
PS120	Solar panel kit (BA120 Battery* required)

The characteristics, technical specifications and accessories may vary without prior notice
